

## Sabrina or Jayne? *by Rick Astley*

Last month we asked you to decide whether the Mark 1 Austin-Healey Sprite better deserved the British designation of Frogeye or the American one of Bugeye. This month we ask a similar question regarding the early 1974 MGB, which sported some very large over-riders as an interim measure (before the mid-'74 launch of the rubber-bumper model) in order to meet new US bumper height and impact regulations. The Brits called them Sabrinas, while Americans decided they were Jayne Mansfields, each titled after an actress from the respective nations.

*Sabrina*

*Jayne Mansfield*

Americans decided they were Jayne Mansfields, each titled after an actress from the respective nations.

Last month we offered an opinion. This month we more cautiously let you decide. All we can say is that both were outstanding actresses!
